

# How to Set a VCR Clock

WHEN CURRENT CLOCK SETTING BLINKS 12:00

## INTRODUCTION

Today, what people once thought was advanced technology, is becoming obsolete. It is difficult to find parts and even information for those certain “old” technological instruments. VCRs are considered nearly obsolete due to the invention of DVD and Blu-Ray players, yet several Americans still use VCRs. When people encounter simple difficulties with their VCR, it may be difficult to find information about correcting the problem. This guide will help you reset your VCR clock when it is blinking “12:00.” Follow the basic directions if your VCR manual is not available. Before you begin, be sure that the VCR is connected to the TV.

## CONNECTING VCR TO TV

For Steps 1 and 2, See FIGURE 1 Below

1. Locate AV Cables (Red, Yellow, White)
2. Connect AV Cables to back of the TV by inserting plugs into corresponding color outlet

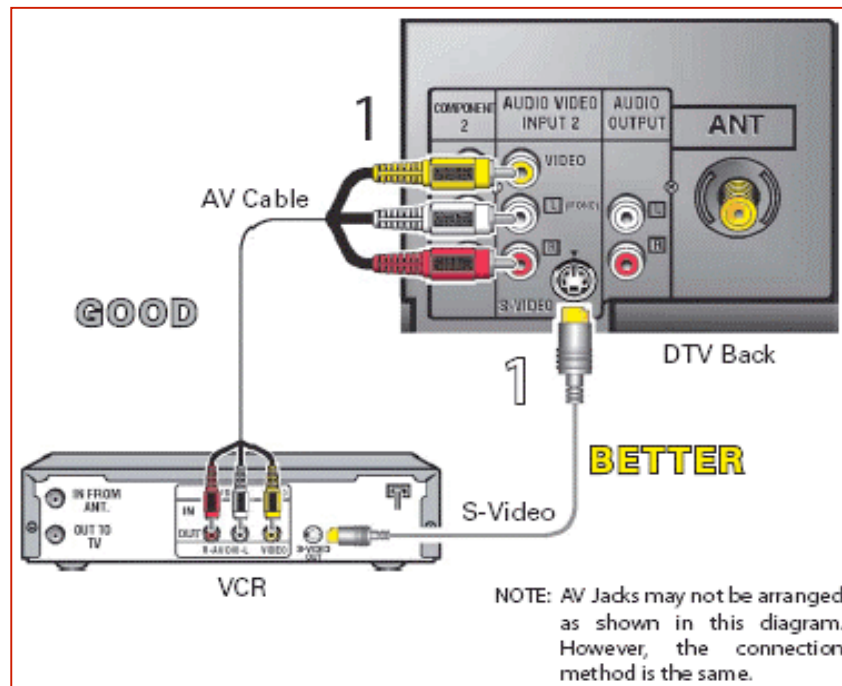

FIGURE 1

### **RESETTING VCR CLOCK**

1. Turn on TV
2. Turn on VCR
3. Locate VCR Remote and push the "MENU" button
4. Scan the VCR Menu for "Clock Settings," "Time/Date Settings," or "Time Settings" and press the "Select/OK" button on the VCR Remote
5. You will see a new menu that should give you a "Set Clock" or "Set the Time" option. Select that option by pressing the "Select/OK" button.
6. Depending on the type of VCR, you should be able to set the time by typing the actual numerals or pressing the "up/down" arrows provided by the menu or remote

### **STILL HAVING TROUBLE?**

**If this guide still has not solved your problem, visit <http://www.usersmanualguide.com/> to find your VCR's User Manual online and more information about resetting your VCR clock.**
